

The DRAW Pantographic Mini Arm is manufactured with hardened, chrome plated steel rods. It slides over linear bearings, both vertical and horizontal direction, and has a 360° rotation.

O encaixe de ferramenta na peça pode ser feita sob medida para cada aplicação. The tool insert in the part can be tailor-made for each application.

It assures a quick positioning of the tool, facilitating the operator work and providing more safety and ergonomics in the work.

The DRAW Pantographic Mini Arms are equipped with two DRAW Balancers model P3 from 0,5 to 3kg of load capacity each.

By using the balancers, it is possible to adjust a higher or lower intensity to raise or lower the tool, as follow:

- To load, turn clockwise the balancer central spindle with aid of a standard fixed key.
- To download, only press the external spring ring to the left.

Applied for:

Screws, nut runner, drill.
Supports torque up to 35 NM.
